Subject: Ch 5 comments

Rick,

I'll try to be brief.

pg 5-9 The NPS program is not a drinking water program; it belongs in sec. 5.2.1.x.

pg 5-11 CVPIA - What about "tool box" water? ^,

pg 5-11 Accord - water supply impacts from the Accord discuss here, or are they discussed elsewhere, such as cumulative impacts?

pg 5-13 5.3.1 At the top of this section on the ERP, I suggest the following "The ERP may convert 127,000 to 151,000 acres of important agricultural land to various forms of habitat; 98K to 115K in the Delta, 20k to 26 k in the Sac Valley, and 9K to 10K in the SJV. This does not include 355,000 to 385,000 acres of agricultural land that are anticipated to be cooperatively managed for the benefit of waterfowl and should have minimal impact on agricultural lands."

The land use tables should be placed as close to the land use discussion as possible.

Table 5.3-3 should include an All Regions column. RICK.

Thanks for considering these comments.

Agree - discussion exists in new §5.

Existing conditions.
Ray
